## Rocky gives kids their day

NORTH Perth resident Talita Radin helps distract sick children by taking her dog Rocky to visit them in hospital.

The pair recently visited Princess Margaret Hospital as part of their 100th anniversary celebrations and the Border Collie was a hit.

Five-year-old Rocky loves children and assists with their therapy by providing a distraction from the daunting hospital environment.

"I think it's great that PMH think outside the square with therapy – it's not just boring medicine," Ms Radin said.

Rocky and his owner are part of Animal Companions WA.
